Leaders.

DE&I Engagement Launch

At our 67th Annual Conference in August—attended by over 500 women, allies, and industry partners in Minneapolis, MN—President Lauline Mitchell announced NAWIC's new partnership with the Calling All Allies Projects (CAAP), led by Dr. Brandi Baldwin. The partnership supports NAWIC's mission to continue to evolve by fostering a more inclusive culture in our association and the construction industry.

November Safety Message

November Safety Reminders

Safety Reminder Topics of the Week:

- 1. Fall-Back has begun and daylight-saving time is ending** – This means your crews may have limited light leaving to go home which can cause access hazards. Are you prepared for the change?
- 2. Have you ordered your Winter Gear?** To get ahead of shipping and supply issues, order your winter work gloves now, especially Winter Cut Resistant Gloves, and also stock hats and clothing.
 - a. Do you have your Winter Weather contingency plans in place?**
- 3. Remind your Trade Professionals to hydrate properly** – It is common during this time of year for team members to consume coffee all day. Remind them to hydrate with water.
- 4. Carbon Monoxide Hazard** – Enclosing areas for warmth can create a carbon monoxide hazard. Use electric tools and battery powered generators and lights to avoid this hazard. A simple CO detector can help identify the hazard in open places.

Cooler Weather Clothing Hazards

Info below from the OSHA Website

→ **Tuck in the hoodie strings or remove. The hazard is real.**

The Coaching Corner with Michael Riegel: Stop Trying to Swim Against the Current

The Coaching Corner with Micheal Riegel

Crazy is now a word

I have gotten certified in the use of several assessment tools. Each time, I take the assessment myself and use the results as the basis for the online modules. Each time, I answer honestly and to the best of my ability. I don't know about you, but the subjective wording of some questions seems to make me stop and think. Each time, I read the report and nod in agreement at the results. They all seem to measure different traits and yet measure the same traits. I think I'm at the point where taking one more assessment will not really give me any new information or insight.

So why do we put ourselves through the process? Perhaps we have a hard time accepting that the results are valid and reliable. Is there a tool that will miraculously announce that I'm an extrovert? Or that I now make decisions based on intuition rather than facts and data? That won't happen unless I decide to mess with my answers to get a different outcome. That would be like my son taking a Harry Potter quiz to be considered a Gryffindor when he is really a Hufflepuff. I'm done taking assessments and will accept and be proud of who I am and how I am put together. Once we can get to that place, the I think the important question is: now what?

NAWIC Benefits Spotlight

Free Construction Accounting University Educational Series

The image is a promotional banner for a webinar series. At the top left, the Deltek logo is displayed in white on a dark background. To its right is the NAWIC logo, which includes the text 'The National Association of Women in Construction'. On the top right, a teal arrow-shaped banner contains the text 'Webinar Series'. The central part of the banner features a large teal arrow pointing right, containing white line-art icons of a construction crane, a building, and a calculator. To the right of this arrow, the title 'Construction Accounting University' is written in large, bold, white letters. At the bottom right, a blue button with white text says 'Save Your Seat'. The background of the banner is dark with faint images of construction equipment and documents.

Have you been considering transforming your accounting from standard methods to construction-specific accounting methods? If so, you don't want to miss out on this free educational opportunity brought to you by NAWIC and Deltek ComputerEase.
